CCA

A. B. SEE ELECTRIC ELEVATORS FOR RESIDENCES.

A SMALL push button is placed alongside the door on each floor and by pressing this button the car is brought to the floor and stopped, the car

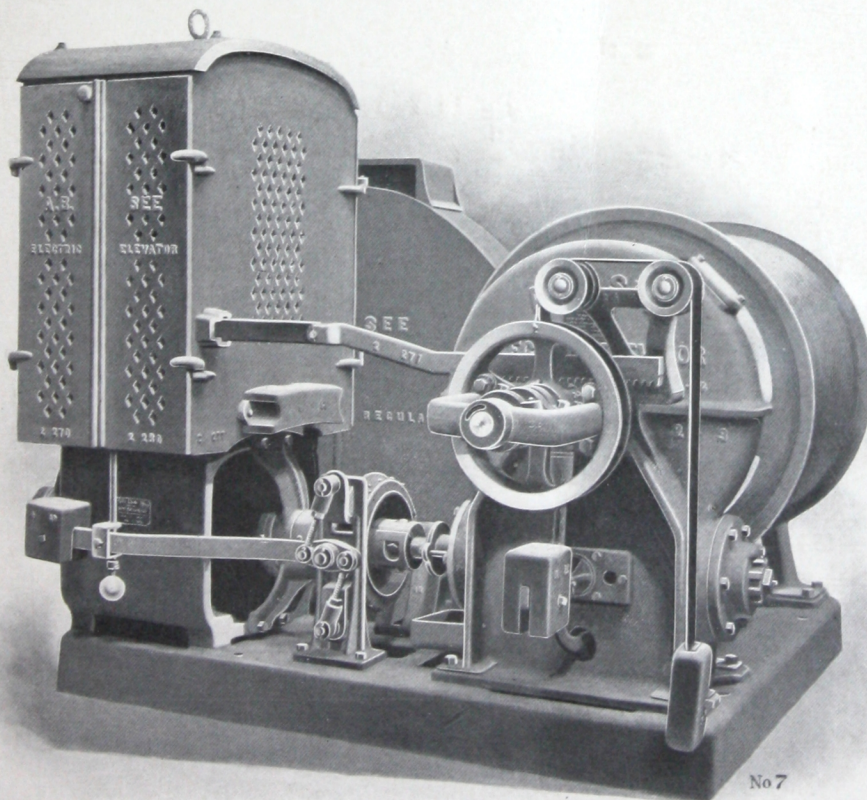

unlocking the door. When the door is opened the electricity is automatically cut off from the machinery,

so that the car cannot be moved until the door is again closed. The person desiring to use the elevator steps into the car, closes the door and pushes the button in the car numbered to correspond with the floor he desires to reach. The car immediately travels to that floor and stops. When the car moves the door is automatically
